WHY INTERIMAGE?

InterImage's RPA expertise is backed by its 20+ year history of providing end-to-end business process automation and BPM solutions to our Federal government customers. InterImage uniquely brings large company capabilities with small company attention, quickness and costs. InterImage recognizes RPA as being core the future of IT modernization and has made the internal investments necessary to fully support the ambitions of our customers.

ROBOTIC PROCESS AUTOMATION

UiPath Gold Partner

- Trained and certified UiPath Developers, Solution Architects, Business Analysts, and Infrastructure Engineers
- Rapid access to UiPath top technologists
- Discounted UiPath licensing

UiPath GOLD PARTNER

BUSINESS PROCESS MANAGEMENT

Automation Experience

- 20+ years of automating mission-critical large and small business processes from Facilities Management to HR to Finance to Criminal Justice, Telecommunications and more.
- Key projects include:
  - Investigative case management (Army)
  - Law enforcement systems (Army)
  - Enterprise workflow management (FBI)
  - Unified Contracting System (FAA)
  - Criminal Justice Investigative System (Navy CJIS)
  - Corrections Management Information System (Navy)

The RPA Advantage:

Speed & Rapid ROI
- Bots are 15 times faster and more efficient than their human counterparts
- Implementation of an RPA wave takes about 3 months, versus 6-12 months with other technologies, such as BPM and Enterprise Application Integration.
- ROI with RPA can be seen in 6-9 months, versus 18-30 with other technologies

Quality
- Bots promote accuracy and eliminate human error, with the potential to reach a 100% accuracy rate

Scalability & Flexibility
- Bots can be scaled up/down in minutes at no extra or minimal cost, while maintaining consistency

24/7/365 Services
- Bots are not limited to core business hours

Customer & Team Morale
- Increased throughput and overall productivity, decreased delivery time, improving service delivery and allowing employees to focus on value-add strategic work

Cost Reduction
- A robot costs a fraction of an FTE

Non-Invasive Technology
- Doesn't require major changes in IT architecture or deep integration with the underlying system. Processes and data security become stronger. RPA offers a reliable, but fast and cost-efficient way for a "light-weight" integration into processes and IT assets.

Insights & Analytics
- Audit trails available 100% of the time.
- All activities performed by robots can be logged and interpreted through customized reporting tools, such as visual dashboards that can be adapted for each operational requirement

IDEAL PROCESSES FOR RPA

- ✓ Manual and repetitive tasks
- ✓ High transaction volumes
- ✓ High risks of human error
- ✓ Mature and predictable processes
- ✓ Rules-based and conditional logic
- ✓ Large numbers of systems interfaced

AUTOMATE NOW

- Quickly sole source pilot programs through our GSA STARS II GWAC to get repetitive tasks automated and see a rapid ROI
- Up to $4M annually and ability to renew
- No need to go through the lengthy RFP process

PRIME CONTRACT VEHICLES

InterImage is a contract holder on major Government-Wide Acquisition Contracts (GWAC), which attests to the breadth and depth of our capabilities, performance, maturity of systems and processes, and performance.

- GSA Alliant 2 Small Business
- GSA Alliant Small Business
- GSA 8(a) STARS II, Constellation 1 & 2 ; All Functional Areas
- GSA IT Schedule 70, 42 Government and Contractor Site
- Other Transaction Agreements (OTA):
  - C5 Consortium
  - SOSSEC Consortium
